

## Killer whales of Sea Lion Island

# Lunga - ESRG\_004

### PREVIOUS NAMES AND CODES

None

FIRST SEEN: 2013

SIZE: Small

SEX: Unknown

### NOTES

Likely calf of Bozza, young; always associated with Bozza. It just stayed around SLI for about a week in 2013, always together with Puma, Nene and Tazzina. Very playful with Nene and Tazzina, often showed tail

### FEATURES

#### - General

Light grey in colour with lighter saddle patch

#### - Right side

No visible features in the pictures obtained in 2013

#### - Left side

Many lines in the whole left side

L1) A group of white lines, parallel, forming together like a triangle pointing down in the saddle patch. It resembles a scribble made by moving a pen back and forth. This is the most peculiar features of Lunga

L2) A group of three long parallel and almost horizontal lines crossed by a right inclined one towards the back of the animal

L3) Two light grey short lines pointing down, placed at the dorsal edge of the body, where the saddle patch ends

#### - Fin

Narrow fin, elongated pointing towards the back of the animal. Very peculiar shape

#### - Tail

Bottom side yellowish in color

T1: six vertical whitish lines in the left part of the bottom side of the tail
